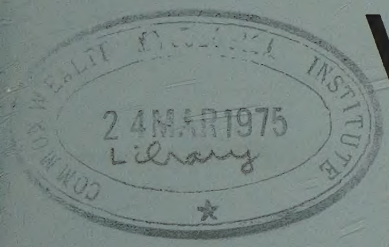
1973 Volume 8 Annual Indexes

ISSN 0034-6624

Review of medical and veterinary mycology



ANNUAL SUBJECT INDEXES, VOLUMES 6 and 7

Because of the change-over to computerized journal production, it has been possible to complete the annual subject index to volume 8 before the indexes to volumes 6 and 7 have been completed.

The delay in supplying the indexes to volumes 6 and 7 is regretted. It is expected that the index to volume 6 will be distributed later this year.

C.A.B. JOURNALS

ANNUAL SUBSCRIPTION RATES 1975

The abstract journals form one part of the range of services in agricultural sciences provided by CAB and provide a total of well over 100 000 abstracts and citations by title each year. They constitute the only comprehensive coverage in English of the world literature on agriculture and related sciences and are available at prices well below the cost of production (except *Food Science and Technology Abstracts*) because CAB is subsidized by the contributing countries†.

The journals are produced by computer techniques, and a consolidated data base is created from which new services will be developed. Most journals are issued monthly, and format is designed to conform with international standards. All data is available on magnetic tape.

Enquiries concerning use of the computerized system, magnetic tapes, or services arising therefrom, should be sent to the Systems Manager, Systems Group, Farnham House.
